DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-40 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,645,743.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variants of each other and claimed subject matter of Claims 1-13 of Application No.10,531,226 significantly overlapping in scope with claimed subject matter of claims 1-16 of US Patent No. 6,645,743.

Chemical structure of specific PHA unit (formula 4 in claim 2 of "743") can be same as chemical structure claimed by Applicant in Claim 1 (when R_3 is $COOR_4$ and R_4 is represent H,K or Na atom), thus copolymers claimed by Applicant in Claims 3- 5 can

Art Unit: 1711

have same chemical structures as copolymers claimed in claim 1 of "743". Same related to method of production of PHA copolymers using same raw materials(see Claim 6, formula 16 of 10,531,226 and claim 5 of "743") and same oxidation process.

3. Claims 1-40 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-40 of copending Application No.10/531,136. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variants of each other and claimed subject matter of Claims 1- 40 of Application No.10,531,226 significantly overlapping in scope with claimed subject matter of claims 1-40 of copending Application No.10/531,136: Chemical structure of specific PHA copolymer claimed in claim 1 ("136") will be identical to chemical structure claimed in ("226") when R_z in formula (3) represented by group of formula(8) with R_1 represented by COOR' and selected from group consisting Na or K atom.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Honma et al.(6,645,743) as it was shown above(see paragraph 2).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
